Attention: Dave Pickrell

**Subject: Suncor Firebag 3 Project
Work Authorization No. 5200035270
Letter of Recommendation**

Suncor would like to take this opportunity to commend CEMATRIX (Canada) Inc. for their professional services and performance while executing the above referenced project comprising the installation of cellular concrete for underground utility services during the year of 2007.

During the performance of the work, Suncor recognized that CEMATRIX'S personnel conducted themselves in a commendable and professional manner, ready and willing to respond to emergency situations and providing Suncor with innovative solutions for unforeseen site conditions which required immediate and corrective action.

The project has also benefited from the assistance provided by CEMATRIX's Engineering department when the parameters and configuration of the underground trenching system was revised by Suncor, this assistance has been greatly appreciated.

CEMATRIX's commitment to Suncor's "Journey to Zero" has been recognized and Suncor would like to thank CEMATRIX (Canada) Inc. for their active participation in this program.

As this project is approaching completion, Suncor is looking forward to working with CEMATRIX (Canada) Inc and its staff on the next phase of the work and are confident that it will be completed in a safe and efficient manner as was demonstrated.

In conclusion, Suncor congratulates CEMATRIX (Canada) Inc. for the successful execution of the above referenced Contract and extends a "Thank You" for your cooperation with Suncor's Project Management.

Kind regards

Karel P. de Jong.
Sr. Contracts Administrator
