PRESS RELEASE

CEMATRIX Corporation Announces First Project in Ontario

Calgary, Alberta – August 18, 2009: CEMATRIX Corporation (TSXV: CVX) (the “**Corporation**” or the “**Company**”) is pleased to announce that the Corporation’s wholly-owned subsidiary, CEMATRIX (Canada) Inc., has received its first order for the supply and placement of cellular concrete in Ontario. The project is a road infrastructure project in the region of Peel, just west of Toronto. Although the sales dollars are not material (less than \$200,000) the awarding of this project to the Company is significant in that it establishes a presence in the Ontario infrastructure market. This is a market place that the Company has been actively pursuing to reduce its dependence on the Alberta oil and gas sector which has been depressed since late last year.

CEMATRIX is an Alberta corporation with its head offices in Calgary, Alberta. The Corporation, through its wholly owned subsidiary, is a manufacturer and supplier of technologically advanced cellular concrete products with applications in a variety of markets, including oil and gas construction and infrastructure construction. Cellular concrete provides a cost and labour saving solution as a replacement for rigid and other insulating materials in frost-susceptible or permafrost conditions. Cellular concrete is also used in void filling situations and as a replacement for granular fills and weak or unstable soils.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
